

SETO HEADLIGHT HYBRID

No more standing in the dark: The hybrid solution of battery and rechargeable battery makes it possible.

The innovative **SETO HEADLIGHT HYBRID** headlamp offers the wearer exceptional versatility and comfort. Depending on requirements, you can choose between cool, warm white and red light. Whether at work, on the construction site, during outdoor activities or in an emergency – this headlamp adapts perfectly to any situation.

The warm white main light is particularly suitable for a clear view and high brightness in dark surroundings. This is also ensured by the three selectable brightness levels. The cold white light, which ensures good visibility even in fog or dust and can be switched to flood or spot light at the touch of a button, provides pleasant lighting that is easy on the eyes. The integrated red light is ideal for maintaining night vision and as an SOS signal in an emergency. The perfect lighting can therefore be found for every situation.

In addition to the numerous light mode options, the **SETO HEADLIGHT HYBRID** is equipped with a dual power supply. This means you can choose between operation with conventional batteries or the rechargeable battery included in the scope of delivery. This guarantees a reliable light source under all circumstances.

The adjustable headband ensures a secure and comfortable fit, regardless of whether the headlamp is worn for hours on end or only used briefly. It adapts to any head shape and offers optimum wearing comfort. The **SETO HEADLIGHT HYBRID** can also be tilted forwards in three stages.

PRODUCT FEATURES

- Versatile light modes: cool, warm white and red light, spot or flood light, continuous light, SOS signal
- Different brightness levels for every situation (warm white light)
- Dual power supply: Batteries or rechargeable battery (included in the scope of delivery)
- Adjustable headband for maximum comfort (included)
- With USB-C charging cable for easy charging of the rechargeable battery included in the scope of delivery

TECHNICAL DATA

Electrical data	
Rechargeable battery / battery	1 x Polymer lithium rechargeable battery, 1,000 mAh, 3.7 V / 3 x AAA alkaline battery
Operating time	Warm white light Highest level: 2.5 h Middle level: 4 h Lowest level: 5 h
	Cold white light Flood light: 12 h Spot light: 8 h
Charging time	2 h
Switching modes	Highest, middle, lowest level (warm white light), flood light, spot light (cold white light), continuous red light and SOS flashing light
Input	Type C, 5 V, 1 A
Luminous data	
Illuminant	4 x CREE XPG cold white LED, 3 W and 1 x warm white LED
Luminous flux	Warm white light Highest level: 650 lm Middle level: 320 lm Lowest level: 150 lm
	Cold white light Flood light: 120 lm Spot light: 250 lm
General data	
Operating temperature	-20 to +50 °C
Dimensions (l x w x d)	64 x 44 x 38 mm
Material	ABS and PC
Item no.	1424000207
